## **Towards a Regulatory Framework for Structural Interventions in Historical Settlements**

This paper deals with the following six topics:

- 1) Contrasting “societal” and “monumental” Values in the design and implementation of structural interventions in monuments. A strategy of optimization is sought.
- 2) Necessary basic studies on structural Typologies prevailing in the Settlement, as well as pilot studies of “feasible” interventions in representative categories of buildings.
- 3) Specific Design Recommendations.
- 4) Specific Construction Recommendations.
- 5) Advantages and drawbacks of the scheme of Superintendence in implementing structural interventions in historical Settlements.
- 6) Specific reference to the case of Anavatos.
